reporter arrested as Japan finds secret cable leak

By SAM JAMESON Los Angeles Times Service

'TOK YO.—A senior reporter for Japan's third largest national daily newspaper, the Mainichi Shinbun, was arrested yesterday in connection with leakage of top secret foreign ministry cables that have embarrassed both the United States and Japan's Prime Minister Eisaku Sato.

Police arrested Takichi Nishiyama, 40, a reporter who had been assigned to cover the Foreign Ministry until January, after Kikuko Hasumi, 41, a secretary to the deputy vice foreign minister, told them she had copied the documents and handed them to the reporter after he had entertained her at "ryotei" (exclusive Japanese-style restaurants) and other places in May last year.

THE DEPUTY vice foreign minister, Takeshi Yasukawa, former ambassador to the Philippines, revealed he had offered to resign.

Foreign Minister Takeo Fukuda, in a statement issued to the press, said disciplinary action to be taken toward unspecified members of the Foreign Ministry would be announced later.

The secret cables—sent during U.S.-Japan negotiations last May and June on a treaty by which the United States will return control of Okinawa to Japan on May 15—contained references to a deal by which the U.S. would agree in the treaty to pay Okinawa landowners \$4 million for damages but would actually obtain the money from Japan behind the scenes.

THEY ALSO contained a reference to a plea from former U.S. Ambassádor Armin H. Meyer for special considcration to allow a religious broadcasting station, the Far East Broadcasting Co., to remain in Okinawa after reversion because its owner was a relative of President Nixon.

Clifford Marshburn of Whittier, Calif., a board member of the Far East Broadcasting Co., said last week that the station would be turned over to a "group of Christian Japanese . . . and become a local Okinawa company." Marsh-

burn, whose sister-in-law, Mrs. Olive Milhous Marshburn, is Nixon's annt, said the company had asked the President to 'try to help us salvage everything we could

APR 5 1972

The Foreign Ministry acknowledged that the documents—exposed in Parliament March 27 by a Socialist—were authentic. But it claimed that Japan had rejected both American demands before the Okinawa negotiations were concluded.

Sources in the U.S. Embassy, however, admitted to the os. Angeles, Times, that the deal to make it appear the United States was paying damages was, in fact, made.

THE TREATY contains a provision for Japan to pay the U.S. \$320 million. Both governments have refused to give a detailed accounting of this payment.

The arrest of a newsman of a major newspaper prom-

ised to enlarge the political impact of the incident, for which Sato apologized Monday in the Diet (parliament). The 7i-year-old premier also allowed himself to be subjected to a barrage of abuse from the leaders of three opposition parties without making a relort.

tion parties without making a retort.

In addition to opposition demands that Sato bring his term, scheduled to run through October, to an early conclusion, two leaders of his own ruling party—Masayoshi Ohira and Takeo Miki—have suggested that he resign.

TOKYO — What's \$4 million between friendly governments? That might have been the attitude in Washington and Tokyo been the authore in washington and longo but a confroversy over that sum, now raging here, is proving a heavy burden to Premier Eisaku Sato's troubled regime.

The secrecy-in-government issue pre-vailing in America has now spread to Ja-pan. And exposure by the opposition Social-

JAPAN AFFAIRS Weed

ist Party, through apparent documentary leakage, of an alleged covert deal concerning Oldmawa is gravely embarrassing the conservative government.

IT IS HAVING major repercussions polthe statement of the st direction of the Japanese Self-Defense buildup program; a surprise transfer of an Air Self-Defense Force unit to Tachikawa Air Base against local residents' opposition; and an unpopular shipment of equipment of the Japanese Self-Defense Forces to Okinawa, where Japan's flag will replace America's May 15.

In the latest case, although the U.S.-Japanese agreement on reversion of Okinawa states that the United States is obligated to pay the compensation for changes or damage to privately owned land on Okinawa during use by American forces, the exposed documents indicate that Japan's government has a seried to a series of the se ernment has agreed to pay \$4 million in such compensation, as part of \$320 million that it is to pay for the purchase of Ameri-

can assets there.

Actually it's not the money but the principle of the thing — for the government, under questioning in the Diet (parliament) last year, denied the existence of any such

So the real issue is the credibility of Sato's regime, especially in its relations

with Washington and particularly concerning Okinawa.

UNDERLYING the public outrage here is a matter much more important than the \$4 million or even money in general: the explosive issue of U.S. nuclear weapons in the Ryukyu Islands, which Washington has publicly promised to have withdrawn by the time the islands revert to Tokyo's rule.

That, moreover, ties in with the touchy question of assumption by Japan's Solf-Defense Forces of responsibility for the defense of the Ryukyus.

The profoundly pacifist and still strong-The profoundly pacifist and still strongly antinuclear Japanese people have been assured by their current leadership that Okinawa will be free of nuclear arms when it becomes again part of Japan, and that it will stay that way. This also is indicated in the terms of the Okinawa reversion agreement itself.

Sato got President Nixon to agree to the non-nuclear provision under strong pres-sure from moderate, popular Takeo Miki, who is a former foreign minister under Salo but also a leading opponent of the premier within the ruling Liberal-Democratic (conservative) Party and one of the candidates for the succession against Sato's pre-sumed choice, Foreign Minister Takeo Fu-

ON TOP OF THE sensitive political ramifications implicit in this background, many of Japan's people of all walks of life simply don't believe Okinawa really will be nuclear-free after reversion. Their attitude is one of blunt distrust: They suspect that the U.S. military, regardless of agreements or assurances, will secretly keep nuclear weapons at its Okinawa bases.

Hence they don't want their country's Self-Defense Forces to go to Okinawa, even after it reverts officially to Japan, because they fear the move would somehow involve their country in an American military strategy based on nuclear armaments.

So if the word of the governing conservatives cannot be trusted about \$4 million of

taxpayers' money, many of Japan's citizens wonder, can it be trusted either on something that could involve the life or death of the Torness weards? death of the Japanese people?

friendly governments? That might have been the attitude in Washington and Tokyo—but a controversy over that sum, now raging here, is proving a beauty. raging here, is proving a heavy burden to Premier Eisaku Sato's troubled regime.

The secrecy-in-government issue pre-vailing in America has now spread to Japan. And exposure by the opposition Social-

JAPAN APPAIRS

ist Party, through apparent documentary leakage, of an alleged covert deal concerning Okinawa is gravely embarrassing the conservative government.

IT IS HAVING major repercussions pol-itically because Japan's press and people already were aroused over various other sudden and/or secret official moves: procedural irregularity in handling the fourth defense buildup program; a surprise transfer of an Air Self-Defense Force unit to Tachikawa Air Base against local residents' op-position; and an unpopular shipment of equipment of the Japanese Self-Defense Forces to Okinawa, where Japan's flag will replace America's May 15,

In the latest case, although the U.S.-Japanese agreement on reversion of Okinawa states that the United States is obligated to states that the United States is obligated to pay the compensation for changes or damage to privately owned land on Okinawa during use by American forces, the exposed documents indicate that Japan's government has agreed to pay \$4 million in such compensation, as part of \$320 million that it is to pay for the purchase of American that it is to pay for the purchase of American assets there.

Actually it's not the money but the prin-

ciple of the thing — for the government, under questioning in the Diet (parliament) last year, denied the existence of any such

So the real issue is the credibility of Sato's regime, especially in its relations

UNDERLYING the public outrage here is a matter much more important than the \$4 million or even money in general: the \$\frac{1}{2}\$ int[hon or even money in general; the explosive issue of U.S. nuclear weapons in the Ryukyu Islands, which Washington has publicly promised to have withdrawn by the time the islands revert to Tokyo's rule. That, moreover, ties in with the touchy question of assumption by Japan's Self-Defense Forces of responsibility for the defense of the Brukyus.

fense of the Ryukyus.

The profoundly pacifist and still strongly antinuclear Japanese people have been assured by their current leadership that Okinawa will be free of nuclear arms when it becomes again part of Japan, and that it will stay that way. This also is indicated in the terms of the Okinawa reversion agreement itself.

Sato got President Nixon to agree to the non-nuclear provision under strong pressure from moderate, popular Takeo Miki, who is a former foreign minister under Sato but also a leading opponent of the pre-mier within the ruling Liberal-Democratic (conservative) Party and one of the candidates for the succession against Sato's presumed choice, Foreign Minister Takeo Fukuda.

ON TOP OF THE sensitive political ramifications implicit in this background, many of Japan's people of all walks of life simply don't believe Okinawa really will be nuclear-free after reversion. Their attitude is one of blunt distrust: They suspect that the U.S. military, regardless of agreements or assurances, will secretly keep nuclear weapons at its Okinawa bases.

Hence they don't want their country's Self-Defense Forces to go to Okinawa, even after it reverts officially to Japan, because they fear the move would somehow involve their country in an American military-strategy based on nuclear armaments.
