記

ワトソンに手交した要望に対する ^{高等官格} 沖縄側の反応は原則的には日本側要望書の趣旨に賛成であるというものであったが、次のようなコメントがあった。

(1) 沖縄住民の一人当りに対する行政費の支出が本土に比べて少額であるとの点については沖縄の場合には行政費に国防費が含まれない等を指摘して必ずしも納得しない様子であった。

(2) 援助の額についての特運局の腹つもりは30億円程度と述べたことに対し、先方は沖縄の購買業者や琉球政府技術者の能力からいって、かかる多額の援助を消化し得るか否か疑問がある、と述べた。特にウオーナー民政官は30億はいかにも多すぎるという感觸の様に見えた。

先方は30億という様な額が新南に渡ると実際に決った額が昨年と比べて相当の増額であったも、30億に比べれば少ないという事で不満を招くことなるので、かかる数字が外に渡れない様に十分留意する様述べた。

長官よりは開墾事業については消化能力の問題となるが、社会保障、厚生福祉関係の援助は消化能力如何によらず増額し得るはずであると答えていた。

(3) 渡航手続の改善については、現在米国民政府の総務部長と公安部長が上京して改善策を検討中であるので、その報告をまつている段階である報告が合理的妥当なものであれば、そのまま採用するにしたい旨述べた。

(4) 戦没者の叙位叙勲についてはワシントン

回答方督促等を確約した。

(5) 原爆患者の治療については、現在琉球政府において果して沖縄に原爆患者が113名と3名について調査中であるが、果して居るといふことが明らかになった場合には、日本より専門医の派遣等をお願いするつもりと述べた。

(6) また、医者不足の問題については現在のところ解決のための腹案はない旨述べた。

A SUMMARY OF REQUESTS TO BE PRESENTED TO THE HIGH COMMISSIONER ON 28 AUGUST 1964 BY THE DIRECTOR GENERAL, PRIME MINISTER'S OFFICE. (PREPARED BY THE SPECIAL AREAS LIAISON BUREAU)

I. My approach to the matters pertaining to assistance to Okinawa is along the basis of the statement by the late President Kennedy concerning the so-called new Okinawa policy, dated March 1962, and along the lines of U.S. Japan Cooperation. At this time I was given an opportunity to see various bases in Okinawa, and this served to renew my recognition of their importance.

As was stated in the Kennedy statement, I, too, look forward to the return of Okinawa to Japan in the future. In the meantime I am prepared to offer my cooperation for the industrial and economic development of Okinawa and for the improvement of the welfare of the people of Okinawa in order that Okinawa will not be less favorable as compared to the comparable area of the Japanese homeland.

The recent Okinawan situation indicates that thanks to the consideration of the United States and the efforts of the Okinawan inhabitants, conspicuous improvement is being made in many areas. However, it appears that further improvement or a study is indicated in some areas as compared to the Japanese homeland. The areas where an improvement or a study is required include industrial development, organization of a Social Security System, promotion of education, etc. These problems can fall into one of the following categories:

Category #1 - Refers to various assistance and facilities where a study has not been thoroughly made as to their contents.

Category #2 - Refers to those items where implementation is not possible because of the lack of financial ability on the part of GRI and the Shi-Cho-Son in spite of the fact that a concept pertaining to various assistance and facilities has been finalized.

Category #3

- 2 -

Category #3 - Refers to those items the implementation of which would result in the failure or irrational result when applied within the Okinawa area alone in spite of the fact that planning concerning various assistance and its facilities has been finalized.

With the progressive modernization of the economic and social matters in Okinawa, the matters under Categories 2 and 3, not to mention those under Category 1, would increase their importance. Especially Category 2 (matters pertaining to the financial ability of GRI - Shi-Cho-Son) seems to fall considerably below par compared to comparable prefecture in Japan. The reason for this is that with the conspicuous economic development of Japan as a modern industrial nation, the prefecture and Shi-Cho-Son in Japan receive proportionately more financial aid from the government, thereby seemingly increasing the financial difference of Okinawa even more. (In the case of Japanese prefectures, there are many cases where the financial burden is shared by prefectures and by the government. In the case of the GRI the entire burden is shared by the GRI, indicating the difference of the system.)

Next, a typical example of Category 3 is the various insurance system which are considered unsupportable when applied to the Okinawa region only (e.g., Agricultural Disaster Insurance). It is believed that there is a need to come up with some sort of measure in order to recognize the foregoing matters through the U.S. Japan cooperation.

In other words, there are very few problems concerning Okinawa which can be settled by a mere study requiring a short period of time. Therefore, it is considered necessary to make use of the U.S.-Japan Consultative Committee and the U.S.-Japan-Ryukyu Technical Committee in the future, and through constant and continuous cooperation of the concerned personnel in the U.S., Japan, and Ryukyu understanding should be obtained on the policies designed for the development of Okinawa or study those factors which would prevent such a development, thereby promoting the development of Okinawa.

Specific problems pertaining to assistance and other matters under consideration are as follows:

II.

II. REQUEST ITEMS -

a. Assistance for Okinawa -

(1) The Expansion of Financial Assistance.

There are areas where conspicuous improvement has been achieved in some systems and facilities in Okinawa thanks to the good administration on the part of the United States. At the same time there are some areas needing improvement as compared to Japan. As mentioned before, this was caused partly because of the delay in the technical study. But at the same time the delay was believed to have been caused by insufficient administrative expenses (combined total of national government, prefectural, and Shi-Cho-Son) expended in Okinawa as compared to the Japanese homeland.

The following indicates the comparison statistically with a Japan prefecture based on FY 63:

<u>Prefecture (Per Person)</u>	<u>Okinawa (Per Person)</u>
39,000¥(\$108.3) (Approx)	25, 00¥(\$69.4) (Approx)

(This figure is further reduced to 21,000¥(\$58.3) if High Commissioner Funds are excluded)

The limitation of the GRI's self-generated resources (principally tax receipts) might account for the foregoing. However, it is necessary to increase the amount of aid by the United States and Japan in order to increase the administrative expenses comparable to other prefecture in Japan. (Note: The Japanese Government provided local grant allocation, in addition to various national subsidies, to each prefecture and Shi-Cho-Son. This is done in order to readjust the financial revenues of each prefecture and Shi-Cho-Son so that the same degree of administrative level may be maintained through the country. Consequently, the prefectures and Shi-Cho-Sons lacking self-generated revenues receive more allocation from the government, and the prefectures and Shi-Cho-Sons suffering from disasters receive increased amounts especially.

The adoption of this type of method in Okinawa immediately may present a problem. Even if the method used heretofore is continued, there is a need to increase the amount of aid from the United States and Japan.

(2)

(2) Increase of Social Welfare. Social welfare, especially Social Insurance, appears to be conspicuously behind as compared to the Japanese homeland. The examples may be medical insurance, welfare annuities, and pensions. Since these matters appear to be unsupportable economically if applied in the Okinawa area alone, there appears to be a need to analyze the establishment of such assistance and funds through cooperation of the United States and Japan, and thus strengthen the social and welfare phase.

Okinawa is confronted with an extreme shortage of doctors and holds only half the number of the prefectures of Japan having the least number of doctors. Training of doctors must depend at the present time on students receiving national government subsidies and study in Japan. However, the number is limited and it is most difficult to expect to fulfill the requirements speedily and sufficiently. Therefore, it is necessary to come up with a training plan such as the establishment of a medical department in the University of the Ryukyus, or to increase the scholarship students receiving Japanese national subsidies. Your consideration on the program is requested.

(3) Development of Underdeveloped Areas.

The national income has been raised thanks to the economic benefits derived from the so-called Base. However, the living standard of farmers and fishermen in isolated islands is below par and, therefore, it is necessary to exert effort for the industrial and economic development.

It is necessary, in addition to carrying out assistance items as before, to analyze the results of studies made by survey groups from the United States or Japan for the purpose of promoting development plans. The difficult which accompanies the administration of isolated islands seem to serve as an obstacle to the improvement of various areas in Okinawa; and, therefore, if possible, farmlands should be developed through reclamation and conversion, and resettlement promoted to establish the basis for group livelihood and to centralize cultural facilities. Fortunately, Japan excels in agricultural engineering technics and we feel we could offer the fullest cooperation in this area. Your consideration is requested.

(4)

(4) Increase of Educational Facilities.

The desire for academic pursuit is very strong on the part of Okinawans and great efforts are being made by the parents for the education of their children. As a matter of fact the literacy rate is not less favorable as compared with the Japanese homeland. However, Okinawa lacks in educational material and equipment; and therefore, we would like to offer our cooperation in these matters.

(5) Financial Assistance by the Japan Govern-

ment in the Next Fiscal Year (JFY 40). The assistance from the GOJ is to be taken up at the U.S.-Japan Consultative Committee. In view of what has been presented, the Japanese Government is thinking of increasing the amount of aid to Okinawa considerably in the next fiscal year. And, therefore, we would like to request your cooperation by your understanding of the aforementioned items submitted.

Heretofore, considerable amounts of assistance have been realized in public works. As for the assistance in the future, Japan would like to consider assistance in other areas in addition to the aforementioned subject, such as the operating expenses with which the GRI is currently burdened, while keeping in mind the question of settling complete consumption. (For instance, the burden under the livelihood protection law, in Japan, the Japanese Government shares eighty percent and the prefectures share twenty percent, whereas the GRI is charged with a 100% burden, causing further financial pressure.) We request that the foregoing be taken up for discussion.

b. Utilization of Consultative Committee and the Technical Committee. It is considered necessary to make use of the two committees in order to continuously make a study on the economic development of Okinawa and the improvement of the welfare of the people of Okinawa as stated before. We request the cooperation of the United States on this matter.

c. Acceleration of Travel Procedures. This is a matter which had been a subject of argument within a national Diet Committee. It is unavoidable that the United States makes an investigation of travel applicants from the point of view of security, and it is equally unavoidable as a result there may be some nonapproved cases, although small in number. The opposition Dietary members at times take up the question of travel restriction as a mere criticism,

but

but aside from this, since relatives and friends constantly travel between Okinawa and Japan, I would consider it extremely fortunate if you would consider this matter from the point of view of accelerating the travel procedures. The following statistics indicate the number of travelers from Japan in January 1964 to June 1964 period:

Total:	- 22,036 (100%)
Those approved within 3 weeks:	- 19,663 (89.3%)
Those approved in 3 to 4 weeks:	- 1,034 (4.7%)
Those requiring more than 4 wks:	- 1,339 (6%)

We on the Japanese side pay particular attention to the speedy processing, and with the exception of Kagoshima and Hokkaido located farthest from Tokyo, it takes approximately three days to transmit the documents.

d. Posthumous Award of Decorations and conferment of Court Order. In accordance with a decision reached by the GOJ, the posthumous award of decorations and conferment of court order are being carried out every month since April of this year. As to Okinawa, a step was completed on 7 February by the Chief of the Nampo Liaison Office to obtain the understanding of USCAR. Subsequently, a reply was received concerning this matter on 18 March to the effect that it was being studied by a competent authority in the United States mainland. We have not received any further communication since. We request your speedy reply. This matter is being implemented under a Five Year Plan. Under JFY 1965, approximately 5,000 cases are to be processed.

e. Treatment of Atomic Bomb Victims. A question came up on several occasions in committee meetings of the Diet held recently concerning the necessity of giving some sort of treatment to Atomic Bomb Victims residing in Okinawa numbering several tens. If there are truly Atomic Bomb victims residing here then we would like to consider dispatching specialists here; and, therefore, we would like to request your consideration. Incidentally, in Japan, Atomic Bomb victims are given free treatment annually, and those who are considered in-patients are given free hospitalization treatment.

f.

f. Utilization of Nampo Liaison Office. It is only natural that important items and unusual items are routed through the diplomatic channels. However, as for minor or routine matters the GOJ would like to see that the Nampo Liaison Office be fully used for the purpose of speedy disposition. We would like to have the understanding of the United States and its cooperation with regard to this matter.
