Mathematics

1. The first part of the book is devoted to the study of the properties of the real numbers. It begins with the definition of the real numbers as the completion of the rational numbers. The author then discusses the properties of the real numbers, such as the least upper bound property, and the relationship between the real and complex numbers.

2. The second part of the book is devoted to the study of the properties of the complex numbers. It begins with the definition of the complex numbers as the completion of the real numbers. The author then discusses the properties of the complex numbers, such as the fundamental theorem of algebra, and the relationship between the real and complex numbers.
